1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification on page 1, before the first line a heading - - - Cross-Reference to Related Applications - - - has been inserted.

In line 2 after " 2001 " - - - , and now patent no. 6,708,572, which application also claimed the benefit of provisional application 60/257,441, filed Dec. 22, 2000, which benefit is also claimed herefor - - - has been inserted.

3. The above changes were made to better comply with 35 U.S.C. 120 and 35 U.S.C. 119(e).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show trace samplers. However, neither they nor any other prior art of record showed or would have made obvious a method for enhancing detection particles of interest in a portal detection system where a plurality of short puffs of air are used as set forth in combination with the provision of a portal structured and used as set forth in claim 1.

5. Claims 1-6 have been allowed.

6. The following is an examiner's statement of reasons for allowance: those apparent from paragraph 4 above. Additionally it is noted that Megerle, US patent no. 6,610,977, not prior art, which is the patent corresponding to the published application by Megerle cited in the IDS, does not claim, or suggest from its claims, the claiming of a method like discussed in paragraph 4 above. The claims of the published Megerle application do not do so either.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom Noland whose telephone number is (571) 272-2202. The examiner can normally be reached on weekdays from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Hezron E. Williams, can be reached on (571) 272-2208.

The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
